KARTA PRODUKTOWA

Digima DK7720 wire EDM machine — working travel 200 × 250 mm, table size 270 × 420 mm

CNC Wire EDM Machine

Digima DK7720 Wire EDM Machine

Compact CNC wire EDM machine for precision machining of small workpieces

Digima DK7720 is a compact CNC wire EDM machine designed for precision machining of smaller metal workpieces. It is ideal for toolrooms, workshops, mould and die production, as well as single-piece and series production requiring accuracy and repeatability.

The **DK7720** model offers a working table travel range of **200 × 250 mm**, the ability to machine workpieces up to **200 mm** high and a maximum workpiece weight of **100 kg**. Its small, stable design saves space while maintaining machining precision.

100 kg

Compact wire EDM machine for precision machining of small components.

The DK7720 combines a practical working area, compact construction, a 100 kg table load capacity and the ability to accurately produce complex shapes in metal components.

Key Advantages

Why choose the DK7720 wire EDM machine?

Table travel of 200 × 250 mm — a practical working range for machining small precision workpieces.

KARTA PRODUKTOWA

Working table 270 × 420 mm — a compact working surface makes clamping and positioning the workpiece easier.

Maximum workpiece height of 200 mm — allows machining small structural and tooling components.

Workpiece load capacity of 100 kg — stable construction prepared for machining workpieces weighing up to 100 kg.

Precision wire EDM machining — ideal for moulds, dies, tools and complex contours.

Compact machine weight of 800 kg — a compact design while maintaining stability and operating accuracy.

DK7720 version — a machine designed for accurate machining of small metal components.

Industrial applications — toolrooms, moulds, dies, metalworking and the production of precision workpieces.

Applications

What applications is the Digima DK7720 suitable for?

The Digima DK7720 wire EDM machine is designed for accurate machining of metal materials, especially where traditional cutting methods are insufficient or cannot achieve the required geometry. The machine enables the cutting of precise contours, holes, technical shapes and forming components.

Mould production — manufacturing precise mould components and working cavities.

Dies and stamping tools — machining components requiring high shape accuracy.

Toolrooms — manufacturing and refurbishment of tooling components.

Metalworking industry — cutting complex contours in metal workpieces.

Small precision workpieces — machining components that require accurate wire guidance.

KARTA PRODUKTOWA

Single-piece and series production – repeatable machining of technical components.

Technical Specifications

Technical Parameters – Digima DK7720

Model **DK7720**

Machine Type **CNC Wire EDM Machine**

Brand **Digima**

Condition **New**

Working Table Size **270 × 420 mm**

Working Table Travel **200 × 250 mm**

Maximum Workpiece Height **200 mm**

Taper **6 / 80 mm**

Maximum Workpiece Weight **100 kg**

Machine Weight **800 kg**

Machine Dimensions **1160 × 880 × 1400 mm**

Main Applications **Mould and die production, toolrooms, metalworking industry, machining of small precision workpieces**
