Digima DK7735 Wire EDM Machine

Digima DK7735 wire EDM machine – working travel 350 × 450 mm, table size 380 × 650 mm

CNC Wire EDM Machine

Digima DK7735 Wire EDM Machine

Precision wire EDM machine for moulds, dies and technical workpieces

Digima DK7735 is a wire EDM machine designed for precision machining of metal workpieces. It is ideal for toolrooms, mould and die production, metalworking facilities and any application where accuracy, repeatability and the ability to produce complex shapes are required.

The **DK7735** model offers a working table travel range of **350 × 450 mm**, the ability to machine workpieces up to **400 mm** high and a maximum workpiece weight of **300 kg**. Its compact and stable construction supports accuracy and convenience in everyday operation.

Compact wire EDM machine for precision metal machining.

The DK7735 combines a practical working area, stable construction, a 300 kg table load capacity and the ability to accurately produce complex shapes in metal components.

Key Advantages

Why choose the DK7735 wire EDM machine?

Table travel of 350 × 450 mm — a practical working range for machining tooling and production workpieces.

Working table 380 × 650 mm — the working surface makes clamping and positioning the workpiece easier.

Maximum workpiece height of 400 mm — allows machining taller structural and tooling components.

Workpiece load capacity of 300 kg — stable construction prepared for machining heavier workpieces.

Precision wire EDM machining — ideal for moulds, dies, tools and complex contours.

Stable machine weight of 1440 kg — the mass of the construction supports accuracy and reduces vibration during operation.

DK7735 version — a machine designed for accurate machining of metal components.

KARTA PRODUKTOWA

Industrial applications – toolrooms, moulds, dies, metalworking and the production of technical workpieces.

Applications

What applications is the Digima DK7735 suitable for?

The Digima DK7735 wire EDM machine is designed for accurate machining of metal materials, especially where traditional cutting methods are insufficient or cannot achieve the required geometry. The machine enables the cutting of precise contours, holes, technical shapes and forming components.

Mould production – manufacturing precise mould components and working cavities.

Dies and stamping tools – machining components requiring high shape accuracy.

Toolrooms – manufacturing and refurbishment of tooling components.

Metalworking industry – cutting complex contours in metal workpieces.

Technical workpieces – machining components that require precise wire guidance.

Single-piece and series production – repeatable machining of technical components.

Technical Specifications

Technical Parameters – Digima DK7735

Model **DK7735**

Machine Type **CNC Wire EDM Machine**

Brand **Digima**

Condition **New**

Working Table Size **380 × 650 mm**

Working Table Travel **350 × 450 mm**

Maximum Workpiece Height **400 mm**

Taper **6 ~ 30 / 80 mm**

Maximum Workpiece Weight **300 kg**

Machine Weight **1440 kg**

Machine Dimensions **1660 × 1330 × 1700 mm**

Main Applications **Mould and die production, toolrooms, metalworking industry, machining of technical**
