Digima DK7755B Wire EDM Machine

KARTA PRODUKTOWA

Digima DK7755B wire EDM machine — working travel 550 × 850 mm, table size 596 × 1060 mm

CNC Wire EDM Machine

Digima DK7755B Wire EDM Machine

Precision CNC wire EDM machine for machining medium-sized and larger workpieces

Digima DK7755B is a CNC wire EDM machine designed for precision machining of electrically conductive metals. It is ideal for toolrooms, mould and die production, the metalworking industry, as well as single-piece and series production requiring accuracy, repeatability and stable cutting.

The **DK7755B** model offers a working table travel range of **550 × 850 mm**, the ability to machine workpieces up to **500 mm** high and a maximum workpiece weight of **850 kg**. Its stable construction and machine weight of **2600 kg** support machining accuracy.

Maximum Workpiece Weight

850 kg

Practical working range, stable construction and high cutting precision.

The DK7755B combines a 550 × 850 mm working area, a 596 × 1060 mm table, an 850 kg workpiece load capacity and the ability to produce complex shapes in electrically conductive materials.

Key Advantages

Why choose the DK7755B wire EDM machine?

Table travel of 550 × 850 mm — a practical working range for machining medium-sized and larger technical workpieces.

Working table 596 × 1060 mm — a large surface makes clamping and positioning workpieces easier.

Maximum workpiece height of 500 mm — allows machining taller structural and tooling components.

Workpiece load capacity of 850 kg — stable construction prepared for machining heavy workpieces.

Precision wire EDM machining — ideal for moulds, dies, tools and complex contours.

Stable machine weight of 2600 kg — the heavy construction supports accuracy and reduces vibration during operation.

DK7755B version — a machine designed for accurate machining of medium-sized and larger metal components.

KARTA PRODUKTOWA

Industrial applications – toolrooms, moulds, dies, metalworking and series production.

Applications

What applications is the Digima DK7755B suitable for?

The Digima DK7755B wire EDM machine is designed for accurate machining of metal materials, especially where traditional cutting methods are insufficient or cannot achieve the required geometry. The machine enables the cutting of precise contours, holes, technical shapes and forming components.

Mould production – manufacturing precise mould components and working cavities.

Dies and stamping tools – machining components requiring high shape accuracy.

Toolrooms – manufacturing and refurbishment of tooling components.

Metalworking industry – cutting complex contours in metal workpieces.

Series production – repeatable machining of components requiring accurate wire guidance.

Technical workpieces – machining components with greater weight, height and working surface requirements.

Technical Specifications

Technical Parameters – Digima DK7755B

Model **DK7755B**

Machine Type **CNC Wire EDM Machine**

Brand **Digima**

Condition **New**

Working Table Size **596 × 1060 mm**

Working Table Travel **550 × 850 mm**

Maximum Workpiece Height **500 mm**

Taper **6~60 / 80 mm**

Maximum Workpiece Weight **850 kg**

Machine Weight **2600 kg**

Machine Dimensions **2070 × 1770 × 1790 mm**

Main Applications **Mould and die production, toolrooms, metalworking industry, single-piece and series**
