Digima QA32-12A 900 kN Punching Machine

KARTA PRODUKTOWA

Punching and Shearing Machine

Digima QA32-12A **900 kN Punching Machine**

A professional, multifunctional metalworking machine for workshops, manufacturing plants and metalworking companies.

QA32-12A is a Digima punching and shearing machine with a **900 kN** force, designed for intensive metalworking. The model combines punching and shearing functions, allowing multiple operations to be performed on a single machine.

The machine enables punching round and oblong holes, cutting flat steel, round steel, angle sections and channel sections, as well as trimming and processing various steel profiles. It is a robust design for intensive, repetitive workshop and production work.

Shearing Force **900 kN**

Machine Model **QA32-12A**

Max. Flat Steel Cutting **330×12 mm**

Total Power **4,0 kW**

Applications

One Machine – Multiple Metalworking Operations

QA32-12A reduces the number of separate workstations required. On one machine, you can punch, cut, notch and prepare steel components for further production or assembly.

Hole Punching

The machine enables punching round and oblong holes in steel components.

Flat Steel Cutting

QA32-12A cuts flat steel up to 330×12 mm, making it suitable for preparing robust structural components.

Round Steel Cutting

The machine enables cutting round steel, bars and circular-section components up to 40 mm.

KARTA PRODUKTOWA

Angle Cutting

The punching machine processes steel angles up to 125×125×12 mm.

Channel and Profile Cutting

The machine enables trimming channel sections and processing various steel profiles in production work.

KARTA PRODUKTOWA

Steel Plate Cutting

The press enables cutting components from steel plates and preparing them for further production.

Angle Section Cutting

The machine enables repeatable cutting of steel angles in workshop and production work.

KARTA PRODUKTOWA

Przecinanie at an angle

The machine facilitates angle cutting and preparation of structural components for assembly.

Angle Notching

QA32-12A is well suited for notching, cutting and processing steel angles.

On our YouTube channel [@Digima_DC](#), you can see how our punching machines perform in practice and how they handle different steel components.

Key Benefits

High-Performance 900 kN Punching Machine for Intensive Metalworking

900

Very High Cutting Force

A 900 kN shearing force enables effective processing of heavier steel components.

KARTA PRODUKTOWA

9w1

Multifunctionality

Multiple operations in one machine: punching and cutting flat bars, bars, profiles and angles.

High Performance

Up to 30 strokes per minute supports efficient, repeatable work in production and workshop environments.

IND

Industrial Design

The robust machine design supports stable operation during intensive metalworking.

Compact Dimensions

Dimensions of 1100×700×1450 mm make the machine easy to position in a workshop or manufacturing plant.

Various Steel Profiles

QA32-12A enables work with flat bars, bars, angles, channel sections and profiles.

Technical Specifications

Technical Data – Digima QA32-12A

The table below presents the technical data of the QA32-12A model – a powerful punching and shearing machine for steel components with a 900 kN shearing force.

Technical Specifications – QA32-12A

Parameter

Value

Weight**950 kg**

Machine Model**QA32-12A**

Maximum Flat Steel Cutting Thickness**330×12 mm**

Shearing Force**900 kN**

KARTA PRODUKTOWA

Diameter of Round and Oblong Holes **30 / 12 mm**

Tool Stroke **36 mm**

Maximum Angle Steel Size **125×125×12 mm**

Maximum Round Steel Cutting Thickness **40 mm**

Total Power **4,0 kW**

Power Supply **200 V / 230 V / 380 V / 415 V**

Number of Strokes **30 strokes/min**

Machine Dimensions **1100×700×1450 mm**

Packaging Condition **Original**

Digima QA32-12A – Powerful 900 kN Punching Machine for Demanding Metalworking

QA32-12A is a solution for companies that need one robust and multifunctional machine for multiple tasks. The equipment streamlines the preparation of steel components, reduces working time and expands workshop capabilities without the need to invest in several separate workstations.
